**1** Question: What is the range on full battery  
**1** Answer: A recent trip was 2.2 miles total on asphalt with 1 very steep hill, and two medium hills. The rider was a child who weighs about 65 pounds. This used about 50% of the battery life. In roughly 1 1/2 hours use.

**0** votes  
**0** Question: How long does the battery last?  
**0** Answer: Hello friends, the battery is 4.0Ah / 36V 144WH 20 cell strong battery, it can last about 1-3 hours, and it depends on the rider's weight and road surface conditions, thanks!  
 By Fengchi-US on December 11, 2020

Larry **★★★★★** Are you still looking for a hover board? you can stop now!

OK I don't know where to start but before I was buying hoverboards on the Amazon and those Hoverboards have been working the most for couple months before they break. I even told my kids I'm not buying hoverboards anymore! Because it's a waste of money, they just keep breaking!

Until I bought GYROOR hoverboard! I bought one for my son and he loved it! So my second son asked me to buy one for him too. So it has been six months since we own GYROOR hoverboards and did not have any problem!

So now my third son wants one too :) so I

bought this hoverboard and can't be more happier with this purchase!

I bought this hoverboard for my 2 kids.

It arrived fairly quickly and the packaging was OK.

The first problem: one side of the power supply cord was missing (power outlet plug to power transformer). I felt like returning it right then, but the kids really wanted to try it out so I had to create a makeshift connector using an old laptop power cable to charge the battery up. I bought this hoverboard for my 2 kids.

It arrived fairly quickly and the packaging was OK. The first problem: one side of the power supply cord was missing (power outlet plug to power transformer). I felt like returning it right then, but the kids really wanted to try it out so I had to create a makeshift connector using an old laptop power cable to charge the battery up. It took about 3 hours until it was fully charged. I emailed the seller and they sent me an entire power supply in about a week. This unit worked OK for about 2 weeks and then, suddenly, it stopped balancing, meaning the left side was tilted forward at all times while the right side was level to the ground. It was still possible to ride it, but it just wasn't right. I tried re-setting it using the manual provided to no avail. At that point I decided to return it.

Couple more notes that are not critical, but should be a good FYI for those who consider investing in this thing:

- The smart phone app is a complete joke. You rarely see a 2.2 star reviews on Google play store, but trust

★★★★★ Solid and Durable Hoverboard!

Reviewed in the United States on December 30, 2020

Color: Solid tire-black Verified Purchase

I have 2 young boys who are very active and are "hard" on their toys. We have 2 older hoverboards that we purchased for Christmas 2019 that are now very badly banged. I would upload pictures of those hoverboards but don't want to bash other companies. So from that experience I've learned a few things.

First, get a decent sized motor if your kids are going to take it off road like mine do regularly, enjoy going fast, ride up and down curbs/driveways or plan on climbing hills. Our previous model had dual 200w and 250w

motor vs this one has dual 300w motor and you can definitely feel the difference.
